Postdoc, full-time, 3 years

in the Department of Food Chemistry and Toxicology in the research group of Prof. Dr. Doris Marko

Starting date: as soon as possible

The position is embedded in an international interdisciplinary project co-financed by the European Commission.

Research subject:

- Immunomodulatory properties of emerging mycotoxins
- Contribution to AOP development and PBK modelling

Requirements:

- Degree in chemistry, food chemistry, biochemistry or comparable discipline with sound toxicological education
- Completed doctoral degree
- Publications in international peer-reviewed journals

Required expertise:

- Experience in mammalian cell culture, biochemical and toxicological test systems
- Experience in AOP and/or PBK development would be desirable but is not mandatory
